

Food safety-, quality- and environmental policy NordArom AB

NordArom shall through its food safety work produce flavours and colours that are safe for the end consumers. Our customers should also receive a product of expected quality.

NordArom shall have an environmental impact that is the best possible for future generations. NordArom will achieve this by:

- that our business follows, with a good margin, the laws and other requirements that exist on the business
- that all employees know this policy and actively contributes to its compliance according to their authorities and responsibilities they have at NordArom, and by that also working positively for continuous improvements
- that NordArom strives to reduce the environmental impact it contributes to by reducing energy consumption, choice sustainable energy sources and compensate for the areas where the company affects the environment which cannot be avoided due to business
- setting annual goals and accompanying action plans, there is a continuous improvement process in food safety-, quality- and environmental work
- where it's possible, our operations will be led by the awareness of the *ecocycle*, we will as far as possible recycle through waste separation and take care of all hazardous waste
- that we will minimize the use of chemicals and whenever its possible we will make environmentally friendly choices
- that NordArom has an open dialogue with customers, suppliers, employees, government and public about the company's food safety-, quality- and environmental work
